Project Scheduling Work Flow

```
Login to Pro  →  Project Management Module  →  Open a Project
                                                      ↓
                                              Create Project Schedule
                                                      ↓
                                              Key in Activities
                                                      ↓
                                              Fill Up Task Details
                                                      ↓
                                              Key in Dep. (if have)
                                                      ↓
                                              Print Schedule
                                                      ↓
                                              Switch to Actual Progress
                                                      ↓
                                              Print Cash Flow Projection
```

1. Tag to Bill Item (fill up productivity & working hours)
2. Start date
3. Duration
4. Status
5. Progress
6. Total Cost

Auto detect any activities that behind schedule in RED colour
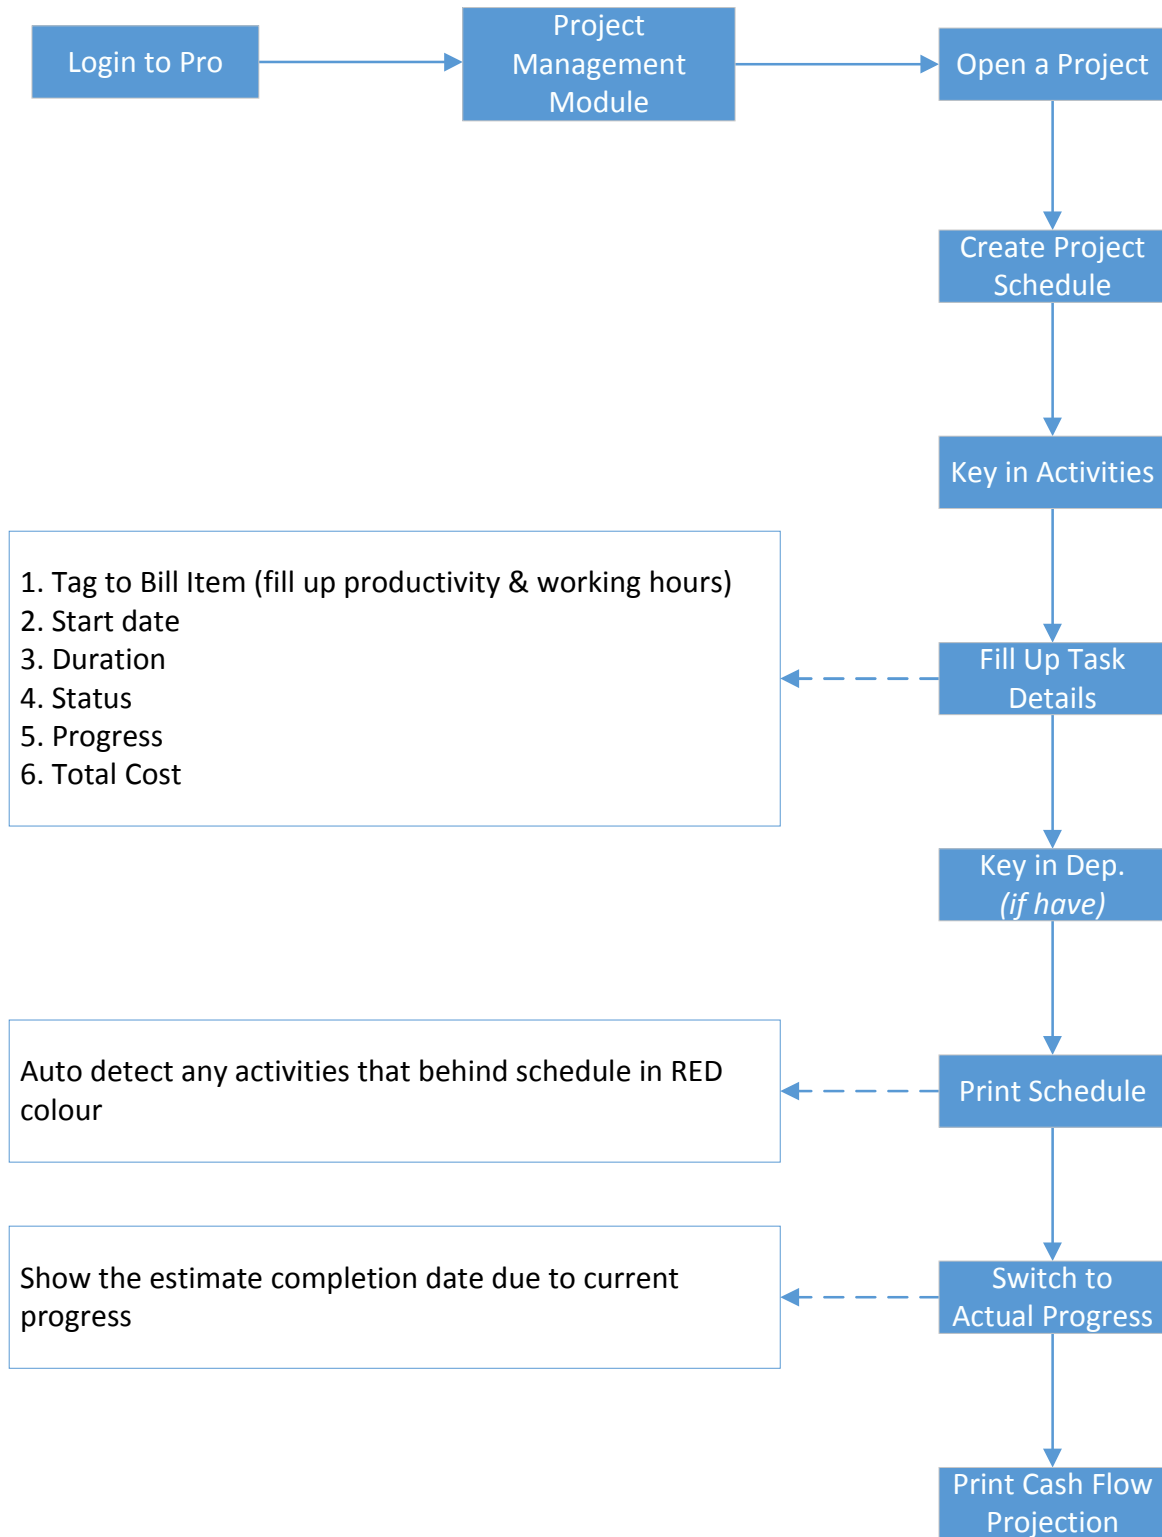

Show the estimate completion date due to current progress

Note;

For BuildSpace eProject user, it will display the cash flow projection chart at project dashboard.
