Schedule of Quantities Module Work Flow

Login to Pro → Project Builder Module → Open a Project

Open a Project → Schedule of Quantities → Create Title

1. Currently only able to import from Buildsoft Cubit

2. Can import from other CAD/BIM measurement software provided they those software vendor willing to collaborate

← Import from BIM Measurement Software ← Create Title

Create Title → Manual Key In

Like measurement sheet to allow user to do manual measurement ← Manual Key In

Manual Key In → Link to Bill Items

1. Can link the QTY to multiple BQ items

2. Any changes of QTY, can update here and it will auto update at BQ items

3. It can't update the QTY directly at BQ items

← Link to Bill Items

Link to Bill Items → Update QTY

Auto detect any activities that behind schedule in RED colour ← Update QTY

Update QTY → Auto Update at BQ Items

It will lock all quantities when BQ already published to tendering stage ← Auto Update at BQ Items

Note;
This function is for users to link a quantity to multiple BQ items and when update a quantity at Schedule of Quantities, it will auto update all the BQ items' quantity
